

Will NV Energy benefit financially from the new SOLAR rule?

One of the biggest misconceptions among solar customers is that NV Energy will benefit financially from the new rule, said Peter Kostas, public information officer at the Nevada PUC.

Will Nevada get 50% of its energy from renewables?

Nevada aims to produce 50% of its energy from renewables by 2030. Currently, renewables account for 28% of Nevada's utility-scale energy generation. The canceled Battle Born solar farm would have contributed one-tenth of Nevada's total energy capacity. (The Las Vegas Review-Journal reports that a Solar Partners spokesperson wrote in an email:)

Could a massive solar panel installation harm Las Vegas' community?

PAHRUMP, Nev. (AP) -- Residents of a desert town west of Las Vegas are protesting plans for a massive solar panel installation they say could harm the community and surrounding environment.

Did NV Energy 'conspire to unlawfully reduce incentives'?

Last month, a group of solar customers launched a class action lawsuit against NV Energy alleging the utility "conspired to unlawfully reduce incentives." Other critics argue that regulators may have violated the contracts clause of the U.S. Constitution for undermining existing agreements between solar companies and electricity customers.

Will Nevada's New SolarCity order hurt the solar industry?

The outcome in Nevada sets a potentially worrisome precedent for the solar industry. SolarCity, which serves 60 percent of Nevada's rooftop market, has seen its stock fall by 37 percent since the new order was approved.

What is the largest solar farm in Nevada?

Nevada's largest solar farm is the 690 MW Gemini, which is being built by Arevia on a 7,000-acre site. It is located around 20 miles away from Mormon Mesa. Nevada aims to source 50% of its energy from renewables by 2030, and renewables currently make up 28% of Nevada's utility-scale energy generation.
