

How can I get solar incentives?

Solar incentives change often, and the best way to get current information is to get solar quotes from local installers. They have expertise in working with state and local governments and can assist you in applying for all the incentives you may qualify for.

Are solar panels eligible for a tax credit?

The first and most important solar incentive to know about is the federal solar tax credit, which can earn solar owners 30% of the cost to install solar panels back on their income taxes in the year after installation.

What is the federal tax credit for solar photovoltaics?

One of the many things this act accomplishes is the expansion of the Federal Tax Credit for Solar Photovoltaics, also known as the Investment Tax Credit (ITC). This credit can be claimed on federal income taxes for a percentage of the cost of a solar photovoltaic (PV) system.

What are the amounts for state solar tax credits?

State solar tax credits vary in amount, usually being a percentage of the total cost of the system. Almost all state tax credits have a maximum, with current amounts between \$500 and \$5,000, depending on the state. They can be claimed in addition to the federal government's investment tax credit.

What factors determine if you qualify for solar incentives?

Whether you qualify to claim solar incentives depends on where you live and other factors like your tax status. States and utility companies offer several types of solar incentives, and homeowners can learn about them on this page.

What is the solar tax credit & how does it work?

The federal solar tax credit, also known as the Investment Tax Credit (ITC), is a 26% tax credit for solar installations in 2024. It is designed to step down to 22% in 2034, then settle at a permanent rate of 10% for commercial installations. For residential installations, the credit will be eliminated starting on January 1st, 2035.
