

New York State's solar plus energy storage incentive

Does New York have tax incentives for solar energy storage?

New York does not have any state-specific tax incentives for installing an energy storage system. However, New Yorkers can save on their taxes with the federal investment tax credit (ITC) when installing a solar-plus-storage system.

Should you install a solar-plus-storage system in Long Island?

For homeowners in Long Island planning to install a solar-plus-storage system, there's good news: You can receive an upfront incentive of \$250 per kilowatt-hour (kWh) of storage capacity through PSEG LI's solar plus energy storage incentive program.

What incentives are available to install solar panels in New York?

New York offers several incentives for solar panel installations. One important incentive is the state solar tax credit, which equals 25% of total installation costs, up to \$5,000. This incentive can be used in conjunction with the federal solar tax credit.

Does New York offer a solar battery rebate?

As of September 2020, commercial solar battery incentives are still available in New York City, Long Island, and Westchester and Edison territory. New York does not have any state-specific tax incentives for installing an energy storage system.

What is the NY-Sun PV incentive program?

This program seeks to credit solar energy producers more accurately without pushing costs onto non-solar customers. Through the NY-Sun PV Incentive Program, New York residents statewide are looking at rebate rates of \$200 to \$400 per kW on solar installations up to 25 kW. That means you can expect a rebate of \$1,200-\$2,400 on a 6 kW system.

What are the incentives for energy storage in New York?

The New York NYSEERDA Retail Energy Storage Incentive Program offers an incentive of \$250/kWh for a total Block of 125 MWh at Block 2 level. In December 2018, the New York Public Service Commission (PSC) adopted targets of 1,500 MW by 2025 and 3,000 MW by 2030 for energy storage.
