

What is Nissan's deal with Envision Group?

YOKOHAMA, Japan - Nissan Motor Co., Ltd. (Nissan) today announced it has entered into a definitive agreement with Envision Group (Envision), a sustainable energy operator, for the sale of Nissan's electric battery operations and production facilities to Envision.

Will Nissan increase its stake in Envision AESC?

Nissan seeks to keep closer tabs on battery development and ensure access to the critical EV component, Bloomberg reports, pointing to Nissan possibly wanting to increase its stake or deepen its alliance with Envision AESC. Nissan had sold its battery subsidiary AESC to Envision Group in 2018 but still holds a minority stake.

Will Nissan build a battery factory?

The plan is for a total capacity of 43 GWh by 2030, of which Renault is to purchase 24 GWh and use the batteries from Douai in the future in the electric R5, among other vehicles. Then in July, Nissan officially confirmed that Envision AESC will build a battery factory at its plant in Sunderland, England.

Who is Nissan's partner for a battery joint venture?

Nissan's partner for the battery joint venture will be Envision AESC (formerly AESC - Nissan and NEC's JV - acquired by the Envision Group in 2019, in which Nissan still holds a 20% share). We already heard multiple times that Envision AESC intends to expand its battery business (including in Sunderland, UK).

Will Nissan build a new EV battery plant?

Nikkei reports that Nissan, together with a Chinese partner, will invest over 200 billion yen (\$1.8 billion) to build two new EV battery plants - one in Japan and one in the UK. Production might start as early as 2024 with a goal to provide enough battery cells for 700,000 electric vehicles annually.

How many EV batteries will Nissan build a year?

The expected total manufacturing capacity will be sufficient for 700,000 cars annually. Nikkei reports that Nissan, together with a Chinese partner, will invest over 200 billion yen (\$1.8 billion) to build two new EV battery plants - one in Japan and one in the UK.

According to the Japanese partners, the announced projects will create 6,200 jobs at Nissan and its UK suppliers, including more than 900 new Nissan jobs and 750 new Envision AESC jobs at its battery plant. Envision ...
