

What type of battery does the Nissan Leaf use?

The Nissan Leaf in the compact EV category uses a Lithium-Manganese oxide battery. Before General Motors discontinued the Chevy Volt, its battery also combined this chemistry with the more popular NMC (Lithium-Nickel-Manganese-Cobalt) variety. Demand may also come from EV charging infrastructure, as Tesla's Powerwall uses the NMC battery.

How long does a Nissan Leaf battery last?

The Nissan LEAF comes with two battery sizes: 40kWh and 62kWh. The 40kWh battery takes 8 hours to charge, while the 62kWh battery takes 11.5 hours. The 62kWh delivers an estimated range of 226 miles, while the 40kWh delivers an estimated range of 150 miles. If you are planning a long journey, opt for the bigger battery.
