It is supplied ready for installation. Driving range exceeds 480km **ORDERS AND DELIVERY:** Packaging: Each battery will be delivered in 1 wooden crate. **INSTALLATION:**

Is it worth replacing the battery in a Nissan Leaf?

It would likely be more worthwhile to just take the \$6,000 and use it as a downpayment on a brand-new car! When you consider that a brand-new Nissan Leaf is around \$31,000, a new 24kWh battery for potentially \$6,000 or more is a pretty expensive proposition. Furthermore, you spend all that money to restore a pretty low driving range, too.

Can EV Rides upgrade a Nissan Leaf's battery?

EV Rides can upgrade your Leaf's battery pack. If you're driving a Leaf with the 30kWh battery, for example, they can upgrade your setup with a 40kWh battery pack, effectively extending your range.

How long does the battery in a Nissan Leaf last?

The battery in a Nissan Leaf is expected to last at least 8 years or 100,000 miles, according to its limited warranty. Most owners predict it will last about 10 years.

What is the battery warranty for the 2020 Nissan Leaf?

The battery is given its own special limited warranty of 8 years or 100,000 miles for the 2020 model year. The warranty specifically covers defects in materials or workmanship for that period/distance.

How can I protect my Nissan Leaf battery?

One of the best ways to protect your Nissan Leaf battery is to use slower, more sustainable charging techniques. Fast charging can add significant wear to the battery. By charging gently, you can help extend the life of your battery.
