

Are EV charging stations permitted in New Jersey?

Installation of EV charging stations or EV make-ready parking spaces is permitted as an accessory use for all municipal zoning or use districts in New Jersey (Reference New Jersey Statutes 40:55D-5 and 40:55D-66.19). The State of New Jersey is working to increase the number of Electric Vehicles (EVs) and related infrastructure to meet the following state goals:

What are electric vehicle charging stations?

Electric vehicle charging stations are flexible devices that can be installed outdoors (on an exterior wall) or indoors (in your garage), inside your property. They are needed for charging electric vehicles inside your property.

How do you charge an electric vehicle?

Charging an electric vehicle is as simple as plugging in- but there are some things to know about charging options, connector types, and charging times. This is the slowest method of charging but is sufficient for many EV drivers. Every EV can be plugged into a standard residential 120-volt outlet using the charger cord provided with the vehicle.

How do I know if a charger is available in New Jersey?

Some even let you know if a charger is available now, if there is a wait time, and if you can make a reservation. The EV EvaluateNJ dashboard is made possible through a collaboration between the NJDEP and Atlas Public Policy to provide analytics regarding the state of transportation electrification in New Jersey.

What is the slowest way to charge an EV?

This is the slowest method of charging but is sufficient for many EV drivers. Every EV can be plugged into a standard residential 120-volt outlet using the charger cord provided with the vehicle. Level 1 charging provides 3-5 miles of range per hour of charging.*That comes out to 35-50 miles of range for 12 hours of overnight charging.

Where can I find a Level 2 charger?

Many public charging stations provide Level 2 chargers. DC Fast Chargers (DCFC), also called quick chargers or superchargers, are popping up all over the country and offer the fastest charging speeds. DCFC require a 480-volt circuit and can be found at highway rest stops, shopping centers, and community charging hubs.
