

What is Nova Scotia's solar energy program?

This program creates the opportunity to buy solar energy from a community provider instead," said Tory Rushton, Minister of Natural Resources and Renewables. "This is just one of the many changes we're making to give Nova Scotians clean, reliable power at affordable rates, while helping us reach our climate change goals."

How does Nova Scotia Power measure solar energy?

Nova Scotia Power measures the solar energy generated by the community solar garden once per month. Then Nova Scotia Power determines how much of the actual generation belongs to you. The solar energy credit is based on the actual energy generated from the sun, so it varies each month based on the season and the weather.

How does Nova Scotia Power work?

Nova Scotia Power starts applying credits to your account the month after you become a subscriber. Nova Scotia Power measures the solar energy generated by the community solar garden once per month. Then Nova Scotia Power determines how much of the actual generation belongs to you.
