What are the best solar incentives in NY?

Aside from the federal tax credit,we believe this state credit is one of the best incentives available to solar customers in NY (or any state for that matter). It provides massive value -- \$5,000 in most cases -- and involves a single-page document to be filled out, which should take fewer than five minutes.

Can you save money switching to solar energy in New York?

Yes, absolutely. There are many ways to save money when switching to solar energy in New York, but taking advantage of the available incentives is one of the best ways to bring costs down. The average cost of a solar electric system in New York State is around \$22,880 before any incentives or around \$16,016 after the federal tax credit.

Does New York offer a solar tax credit?

In addition to the statewide tax credit, New York also offers a solar rebate called the NY-Sun Block Incentiveor the NY-Sun Initiative. This provides a cashback incentive of between \$0.20 and \$0.80 per watt installed for qualifying customers.

Are solar panels a good investment in New York?

Solar panel systems in New York are expensive, but incentives from the state and federal government can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment.

How much is a solar rebate in New York?

Through the NY-Sun PV Incentive Program, New York residents statewide are looking at rebate rates of \$200 to \$400 per kWon solar installations up to 25 kW. That means you can expect a rebate of \$1,200-\$2,400 on a 6 kW system. Be aware, however, that the incentive values get lower as state solar capacity goals are met.

What is the NY-Sun PV incentive program?

This program seeks to credit solar energy producers more accurately without pushing costs onto non-solar customers. Through the NY-Sun PV Incentive Program, New York residents statewide are looking at rebate rates of \$200 to \$400 per kW on solar installations up to 25 kW. That means you can expect a rebate of \$1,200-\$2,400 on a 6 kW system.
