

Where can I find EV charging stations in New Zealand?

If you're an EV driver looking for EV chargers in New Zealand, you're in the right place. Electromaps database contains 296 charging stations available throughout the country, making it easier for drivers to power their vehicles on the go. Auckland is the city with more charging stations in New Zealand.

Does New Zealand have a charging station?

The charging network in New Zealand is not a single utility; it comprises multiple operators and payment systems. A charger can be AC (slower, cheaper; most require your own cable) or DC (faster, more expensive, cable not needed). How do I charge an electric car at a public charging station?

What is New Zealand's national EV charger network?

Our vision for New Zealand's nationwide network of public EV chargers was that it is safe, reliable, and interoperable, meaning all EV drivers can use all chargers. The nationwide network consists of smart, plug-type standardised chargers that are remote-monitored by charging operators and energy suppliers for resilience.

How do I find EV charging points in New Zealand?

Depending on your needs, sometimes our app can be helpful to find charging points in New Zealand. Overall, finding EV chargers in New Zealand has become much easier in recent years, thanks to the growth of charging infrastructure and the availability of tools and resources like Electromaps to help drivers locate charging points.

What is New Zealand's EV charging infrastructure plan?

We are part of a cross-agency working group that is developing a national plan for New Zealand's public EV charging infrastructure. This plan will provide strategic direction for a short-term action plan and long-term strategy to future-proof the charging network.
