

What is OG&E solar energy?

OG&E pioneered the development of Oklahoma wind farms and built the first utility-scale solar energy farm in Oklahoma. OG&E's power mix is 60 percent natural gas, 30 percent coal and 10 percent renewable (wind and solar). Our Branch Arkansas Solar Farm generates enough electricity to power thousands of Arkansas customers.

Does OG&E have a solar farm in Arkansas?

Our Branch Arkansas Solar Farm generates enough electricity to power thousands of Arkansas customers. Located just east of Ft. Smith, the 5-megawatt solar farm sits on 40 acres. OG&E customers in Arkansas can choose to make up to 50 percent of their energy come from solar power.

Does OG&E cover solar panels?

That doesn't mean that you can't cover all of your electricity needs with a solar panel system. OG&E will provide credits on your electricity bill for excess energy produced during the day because of a policy called net metering. With net metering, you'll only be charged for the net amount of energy you're using from the grid.

What makes OG&E a good source of power?

When we build a new source of power generation, we focus on reliability, affordable rates and environmental responsibility. OG&E pioneered the development of Oklahoma wind farms and built the first utility-scale solar energy farm in Oklahoma. OG&E's power mix is 60 percent natural gas, 30 percent coal and 10 percent renewable (wind and solar).

What is OG&E's Power Mix?

OG&E's power mix is 60 percent natural gas, 30 percent coal and 10 percent renewable (wind and solar). Our Branch Arkansas Solar Farm generates enough electricity to power thousands of Arkansas customers. Located just east of Ft. Smith, the 5-megawatt solar farm sits on 40 acres.

What fuels do OG&E use?

Fuel diversity in our power generation fleet ensures reliable and resilient electric service for more than 887,000 customers. Each type of fuel on the OG&E system has its own unique benefits. While natural gas and coal are our base fuels, when the sun shines and the wind blows we also access solar and wind power.
