

Does BC offer a solar energy rebate?

Net Metering - Excess energy can be sold back to the grid and used against your current and future billing cycles. Various institutions in BC offer other energy rebates that don't specifically pertain to solar panel installations. Read the full list of BC energy rebates. Solar power systems vary in cost depending on the size of the installation.

Does California offer a solar rebate?

California is the only state currently offering a rebate for both solar panels and batteries. Eligible homeowners will get up to a 36% rebate depending on the size of their system, with the rebate being capped at a 100kW system.

What is a solar power rebate?

A solar power rebate is an incentive offered by federal or state governments to reduce the cost of going solar. In California, the California Solar Initiative (CSI) handles the state's extensive rebate program. You can receive a lump sum payment or your installer can deduct the amount from the final installed price. Rebates require paperwork to be filed.

How much is a solar rebate in WA?

A 6kW solar system will get you a rebate worth \$2,633 in WA. The passage does not provide information about rebates for other system sizes after 6kW.

Does Victoria offer a solar rebate?

Victoria is currently the only state offering a rebate on both solar panels and batteries. With the labour government's recent election, there is a lot of movement when it comes to new solar rebates and schemes.
