

Can cell phones use car chargers?

Cell phones can use car chargers, depending on the type of plug style they use. Some phones use USB C or USB A chargers, while others may work with wireless car chargers. Ensure you understand what will work with your specific make and model before purchasing.

How does a wireless car charger function?

A wireless car charger works by placing your phone in your car mount or on it. Once your phone is in place, it automatically starts charging. You don't need to plug in a cable every time you get in your car.

How to choose a car phone charger?

When choosing a car phone charger, consider choosing the best cell phone holder for your car. A car phone mount allows you to set your phone in a place where you can easily glance at the screen while still paying attention to the road.

Which wireless car charger should I buy?

If you're looking for a wireless car charger, consider the Velox Pro, which offers cooling. Most Qi chargers for the car are docks, but if you seldom need to mount your phone for directions, or prefer to stow your charging in the center console, the Velox Pro is a great option.

What is the price range of wireless car chargers?

Before anything else, you'll want to figure out how much you're willing to spend on a wireless car charger. Value-priced chargers continue to improve, so you can find a decent wireless charger for less than \$40. Note that to get the fastest wired charging for iPhones, you'll need to use a USB-C-to-Lightning cable, which isn't included.

Do cars come with wireless phone charging?

Wireless phone charging is an essential feature for cars, but the vast majority of newer cars don't have wireless charging capabilities. When they do, it's available only as an overpriced add-on. That means it's up to you to get wireless chargers for yourself.
