

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.

How do I find out if a charging station is nearby?

To find out if a charging station is nearby, use ChargeFinder's station page which shows relevant information like charging speed, outlet type, price, and location. Additionally, the "Food and Shopping Nearby" feature helps you find points of interest near the charging station.

How can I check if a charger is available?

ChargeFinder provides live status for all major operators in one place. On the overview, you can see the number of chargers that are available, occupied, or out of order. With a simple click, you can view the price and availability for each charger.

What if a station is missing from the charging map?

If a charging station is missing from the map, it is easy for anyone to add it. It is also possible to edit and update information on all existing stations.

What is the most common type of charger shown on the map?

The most common type of charger shown on the map is fast chargers that provide 50 kW, which are shown in dark blue on the map. Destination chargers usually provide an output from 3 kW to 22 kW.

How is ChargeFinder updated?

ChargeFinder is continuously updated with new charging stations from various sources. This includes larger charging networks, individual smaller players, and other data sources. The information is supplemented and refined with the help of ambassadors and the growing community.
