

Is a solar power bank worth it?

A solar power bank is useless if it gets easily damaged, which is why this one is designed to endure even the roughest of hikes. . The last thing you want with a power bank is for it to be slow to charge itself and slow to charge your devices, but the four panels on this one make it super efficient and speedy.

Do solar power banks really work?

That's where solar power banks come in. While some can get power from being charged themselves, the main appeal is their ability to turn sunlight into electricity to keep your phone and other items topped up. Out in the wilderness, whether it's just a long walk or a full hike, there are no outlets you can rely on to charge your devices.

Is a solar power bank useless?

A solar power bank is useless if it gets easily damaged, which is why this one is designed to endure even the roughest of hikes. A solar power bank is useless if it gets easily damaged, which is why this one is designed to endure even the roughest of hikes. .

What is the waterproof rating of this solar power bank?

The waterproof rating of this solar power bank is IP 31. But please do not take solar as main power source. It's subject to sunlight intensity and panel conversion rate, which may take long time to charge.

What can you charge with this solar charger?

You can use it to quickly charge Cellphones, Power Banks, Tablets and most 5V USB loads. Using the most efficient SUNPOWER solar panel cells available, it converts 21 Watts of solar energy into electricity with a 22%-25% conversion rate. Use it when going camping, hiking, or when you find yourself in any place without sufficient power.

What is a good solar charger for a small business?

For small businesses, consider the Ryno Tuff 21W portable solar charger. It uses high-efficiency Sunpower X-Series solar cells, offering up to 25% conversion. This 21W charger can fully charge a smartphone or tablet in as little as 2 hours. Never be stranded without power again.
