

What is a LightSaver portable solar charger?

A LightSaver portable solar charger is a device that features integrated batteries and state-of-the-art roll-out thin-film solar panels. This allows you to keep your devices powered on the go. LightSaver Portable Solar Chargers are known for their high-performance electronics, dependability, and compact designs.

What is a rollable solar charger?

The LightSaver rollable solar charger features a built-in, lithium ion battery to provide power to your device anytime. The battery can be recharged either from solar power (in about 6 hours of full sunlight) or by using the included USB micro cable (in about 3 hours).

How do I charge my LIGHTSAVER Max solar panel?

The LightSaver Max can also be charged using USB or 12V input if the solar panel is fully rolled up. A second LightSaver Max or another PowerFilm Solar panel (30W maximum) can be connected to the 12V input to increase solar charging speed (charge time is between 2-3 hours with an additional 30W of solar).

How does the USB+AA solar charger work?

The USB+AA Solar Charger charges most USB devices. Proprietary charging circuitry maximizes charge into the batteries. It provides a full charge in four hours of full sun. Six grommets are built into the charger for secure fastening to a pack or to the ground.

What are the charging options for a LightSaver?

The LightSaver and LightSaver Max can be charged from solar and the wall. These portable solar chargers can be mounted and charged on the go.
