

What is a Smartflower Solar Flower?

A Smartflower Solar Flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. Unlike traditional solar panels, it has a unique appearance. Learn all about this product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

What is a Flower Solar Panel?

The Flower Solar Panel, specifically the Smartflower system, is a ground-mounted solar panel known for its stunning design. Its unique feature includes petals that fold together and unfold whenever the Sun is out. This solar panel is packed with smart features in its installation, mounting, settings, and repair.

How does the Flower Solar Panel work?

The Flower Solar Panel, specifically the Smartflower system, is known for its unique design that folds and unfolds according to the Sun. Each petal has small brushes on the underside. When the petals fold together, the entire system is self-cleaning.

Who is the SmartFlower solar panel system ideal for?

If you care about design and ease of use more than cost-effectiveness, and also do not need to cover all of your energy needs with one system, then the SmartFlower solar panel system can be a good option for you. Alternatively, a rooftop or traditional ground-mounted solar panel system will be much more affordable and practical for most consumers.

How many petals does a SmartFlower solar panel system have?

The SmartFlower solar panel system consists of 12 'petals' which open up at the beginning of the day when the sun comes out.

Does a smartflower produce more electricity than a solar panel?

Thanks to its tracking capability, the Smartflower can produce up to 40 percent more electricity than a similarly-sized rooftop solar panel system, according to Smartflower's website.
