

Who is the best solar company in Grand Rapids?

In Grand Rapids, Tiger Solar is the most reputable local solar company. Our team of experts rates it 4.90 stars, so it's a great choice if you're looking to add solar panels to your home. What are a few of the advantages and disadvantages of installing solar panels?

Do solar panels save money in Grand Rapids?

Not including incentives, you can save an average of \$22,000 over 20 years with your solar panels, too. Average daily sunlight: Since Grand Rapids doesn't get a lot of average daily sunlight, your solar system may not be able to produce enough energy to power your whole home, which affects how much your electricity bills will be.

How much does a 6 kW solar system cost in Grand Rapids?

A 6 kW solar system will cost about \$15,960 in Grand Rapids before incentives. After the 30% federal solar tax credit, this drops to \$11,172, or about \$1.86 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed, and how you finance it.

Do I need a solar battery in Grand Rapids?

No, you don't need to install a solar battery in Grand Rapids. Solar panels can operate and lower your electricity bill even without a battery. However, a solar battery might be a worthwhile investment in some cases. A battery can provide backup power and priceless peace of mind in places with prolonged grid blackouts or extreme weather events.

Are solar incentives a good idea in Grand Rapids?

Solar incentives and rebates can cut the cost of installing solar in Grand Rapids by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.

How do I know if a Michigan solar company is a good company?

Below are some of the criteria we examined specifically for Michigan solar companies: Brand reputation and certifications (20%): We take each company's Better Business Bureau (BBB) score into consideration, as well as how long the installer has been in business (at least 5 years is required, 10 preferred) and what type of solar certifications it holds.
