

Who is the best solar company in Michigan?

Here are the top companies we recommend for solar in Michigan: Stellar Solar has been a leading installer of residential and commercial solar and battery storage since 1998. Since then, we've installed over fifteen thousand solar systems on homes, businesses, non-profits, and faith-based organizations. We've received tho...

Are solar panels worth it in Michigan?

Although Michiganders use less power than most U.S. residents, the electricity rates average around 19.32 cents per kilowatt-hour, which is well above the national average. As such, solar panels are more valuable in Michigan than in most states because the cost they offset is higher per kWh.

Why do Michigan homeowners choose solar?

Michigan's electricity rates have increased over the years, but frequent power outages are another reason why Michigan homeowners choose to go solar. Michigan suffers from frequent power outages, with the state's winter storms posing a threat to the reliability of the power grid during periods of extreme temperatures.

Is solar a good investment in Michigan?

The energy rates are much higher in Michigan than in most other states -- an average of 19.32 cents per kWh as opposed to the national average of 16.79 kWh -- so solar will likely be a good investment for your home even if you use less power than most homeowners in your area. You can check your average consumption on your past energy bills.

How reliable are solar installers in Michigan?

Company experience (10%): The local solar industry in Michigan is really starting to take off, and we've seen less reputable installers pop up to take advantage of the demand. New companies aren't always less reliable, but they are more likely to go out of business, in which case your warranties could be voided.

Who is Michigan solar solutions?

Michigan Solar Solutions partners with the Michigan chapter of the Sierra Club to help bring environmental awareness and clean, renewable energy to Michiganders. ADT acquired SunPro in late 2021, catapulting the company into the solar spotlight.
