

What are solar export tariffs?

At first, solar export tariffs were created in response to the government launching the Smart Export Guarantee (SEG) in 2020. This initiative compels energy suppliers with 150,000 customers or more to pay households for any renewable energy - including solar electricity - they export to the grid.

Should you sign up for a solar export tariff?

Signing up for a solar export tariff is the best way to profit from the excess electricity your solar panels generate. If you choose one of the top tariffs, you can make hundreds of pounds by selling electricity you weren't going to use anyway - and help make the grid greener.

How much do solar panels cost to export?

Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year.

Why do I get a feed-in tariff if I export energy?

When you export excess energy (from your solar or a battery) to the grid, you are paid a feed-in tariff by your energy retailer because you are saving them the cost of buying that energy from the energy market. The network company does not currently charge you for this export, nor do they pay you.

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme.

When will rooftop solar export tariffs be introduced?

By the end of 2022, four Australia electricity networks - Ausgrid, Essential Energy and Endeavour Energy in NSW, and Evoenergy in the ACT - had flagged their plans to introduce rooftop solar export tariffs from 2024. These plans were firmed up and teased out in 2023, as detailed here.

By the end of 2022, four Australia electricity networks - Ausgrid, Essential Energy and Endeavour Energy in NSW, and Evoenergy in the ACT - had flagged their plans to introduce rooftop solar export tariffs from 2024.
