

# Power purchase agreement solar vs lease

What is the difference between a solar lease and a power purchase?

The difference is in the monthly payment. If you can't afford to buy solar panels, a solar lease or power purchase agreement might help. Buying a solar energy system is considerably cheaper today than it used to be, but it's definitely still a huge purchase. Thankfully, there are ways to get solar power without the huge up-front cost.

Should you sign a solar lease or a PPA?

When deciding between a solar lease and a Power Purchase Agreement (PPA), consider that solar leases generally require a flat monthly fee, while PPAs have you pay per unit of electricity. Both options involve contractual rate increases. A virtual PPA or off-site lease agreement enables green power consumption on a property without installing solar panels.

What is the difference between a solar lease and a PPA?

Solar leases and PPAs are very similar, but with a solar lease, you will pay a fixed amount of money per month, while with a PPA, you'll pay per kilowatt-hour. Here's what you should know about both. Most solar lease and PPA options are \$0-down, but some require a down payment or ask you to pay upfront.

Can you buy solar panels at the end of a lease?

At the end of a solar lease, some companies allow you to purchase the solar panels and continue using the solar power produced on-site. Alternatively, the installation company will be responsible for removing the system. A solar Power Purchase Agreement (PPA) is a different financing option where you pay for the electricity produced by the solar panels, not the panels themselves.

How does a solar lease work?

Throughout a lease agreement, you typically pay a flat monthly fee in exchange for the energy the system produces. Solar leases can dramatically cut down on utility power use and reduce your monthly electricity expenses. Some solar leases let you purchase the panels at the end of the lease and continue using the solar power produced on-site.

Is there a difference between a PPA and a lease?

According to Dan Orzech, general manager of the Oregon Clean Power Co-op, there is a difference between a PPA (Power Purchase Agreement) and a solar lease. While there's not a huge difference, the choice between the two essentially depends on whether you prefer to pay a fixed monthly fee (PPA) or a variable fee based on the amount of power you use (solar lease).
