

What is a solar power purchase agreement (PPA)?

A power purchase agreement (PPA) is a financing option for solar panel systems, similar to leasing or renting. In a PPA, a solar company or financier covers all the costs of buying solar equipment and installing it on your roof.

What is a solar PPA?

Solar PPAs are agreements where a solar power provider installs and maintains solar panels on a host customer's property, generating electricity that is then sold to the customer. On-site PPAs involve solar panels installed directly on the customer's premises, while off-site PPAs utilize solar farms located elsewhere.

What is a Power Purchase Agreement (PPA)?

One way to access solar energy is by opting for a power purchase agreement (PPA). This allows you to acquire the system without paying the upfront price.

Who covers the costs of buying solar equipment in a PPA?

In a power purchase agreement (PPA), a solar company or PPA financier covers all the costs of buying solar equipment and installing it on your roof. Financing a solar panel system with a PPA is similar to leasing or "renting" a solar panel system.

Can a homeowner enter a PPA with a solar installer?

Yes, a homeowner, also referred to as the host customer, can enter a Power Purchase Agreement (PPA) with a solar installer. The terms of the agreement can range from five to 25 years. The solar developer will install the panels on the host customer's roof, which will cover the home's electricity usage.

Should I buy solar panels at the end of my PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. However, purchasing the system at the end of the contract would actually cost you more in the long run than if you had purchased a system to begin with.
