

What happened to Primm solar power generating facility?

Upgrade your news experience today! The solar power generating facility that can be seen from Interstate 15, just across the state line from Primm, is set to partially shut down, according to NRG Energy.

Why did PG&E close a solar plant near Primm?

LAS VEGAS, Nev. (FOX5) - The Pacific Gas and Electric Company (PG&E) announced it's terminating a contract that powers a massive solar plant in the Mohave Desert. The energy company said the decision to close the plant near Primm resulted from an audit of its portfolios.

Will PG&E shut down a solar power plant in Nevada?

LAS VEGAS (KSNV) -- Two units at the massive solar power plant near Primm, Nevada will shut down in the coming years as a deal with a California utility winds down. NRG Energy and Pacific Gas and Electric Company, or PG&E, announced they finalized negotiations to terminate two long-term purchase power agreements from Ivanpah Solar Power Plant.

Why did PG&E buy Primm solar in 2021?

In 2021, PG&E set out to prioritize its customers' bottom lines by evaluating potential cost savings. They say "Ivanpah Solar is an example." The contract purchase agreements would have lasted until 2039. The Primm plant went into service a decade ago.

How do I get to Primm Valley solar farm?

There are two primary exits for viewing the solar farm: Exit 286 from Nipton Road. Exit 291 provides the best access, allowing a closer view of the facility. From here, visitors can head west near the Primm Valley Golf Club and take Colosseum Road, which turns into a dirt road, for a more interesting, up-close experience.

Did NRG and PG&E cancel Ivanpah solar power agreement?

NRG Energy and Pacific Gas and Electric Company, or PG&E, announced they finalized negotiations to terminate two long-term purchase power agreements from Ivanpah Solar Power Plant. Ivanpah Solar is a 386-megawatt concentrating solar power plant with three units that cover 3,500 acres on the California side of the Mojave Desert.
