

Why did PG&E close a solar plant near Primm?

LAS VEGAS, Nev. (FOX5) - The Pacific Gas and Electric Company (PG&E) announced it's terminating a contract that powers a massive solar plant in the Mohave Desert. The energy company said the decision to close the plant near Primm resulted from an audit of its portfolios.

How do I get to Primm Valley solar farm?

There are two primary exits for viewing the solar farm: Exit 286 from Nipton Road. Exit 291 provides the best access, allowing a closer view of the facility. From here, visitors can head west near the Primm Valley Golf Club and take Colosseum Road, which turns into a dirt road, for a more interesting, up-close experience.

What happened to Primm solar power generating facility?

Don't miss the big stories. Like us on Facebook. The solar power generating facility that can be seen from Interstate 15, just across the state line from Primm, is set to partially shut down, according to its operators.

Where is the Ivanpah solar plant in Las Vegas?

Just 45 miles south of Las Vegas lies a glistening, pixelated maze with towers poking up from the center. The site may seem like an art installation, but it is actually a solar plant. The Ivanpah Solar Electric Generating System spans 3,500 acres and generates up to 400 megawatts of clean energy, which is enough power for 140,000 homes.

Why did PG&E buy Primm solar in 2021?

In 2021, PG&E set out to prioritize its customers' bottom lines by evaluating potential cost savings. They say "Ivanpah Solar is an example." The contract purchase agreements would have lasted until 2039. The Primm plant went into service a decade ago.

What happened to the world's largest solar power plant?

Photo by Associated Press LOS ANGELES -- What was once the world's largest solar power plant of its type appears headed for closure just 11 years after opening, under pressure from cheaper green energy sources. Meanwhile, environmentalists continue to blame the Mojave Desert plant for killing thousands of birds and tortoises.
