

What is a solar power purchase agreement (PPA)?

A power purchase agreement (PPA) is a financing option for solar panel systems, similar to leasing or renting. In a PPA, a solar company or financier covers all the costs of buying solar equipment and installing it on your roof.

What is a Power Purchase Agreement (PPA)?

A power purchase agreement (PPA) is a financial agreement where a third party (like a solar company) owns and maintains the solar panel system on your property, and you agree to purchase the electricity generated by the system at a predetermined rate. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a PPA.

Is a solar power purchase agreement a good deal?

For many people, a solar power purchase agreement is a solid deal. A PPA allows homeowners without the financial means to outright purchase a solar system to still enjoy savings on their monthly energy bill.

Who covers the costs of buying solar equipment in a PPA?

In a power purchase agreement (PPA), a solar company or PPA financier covers all the costs of buying solar equipment and installing it on your roof. Financing a solar panel system with a PPA is similar to leasing or "renting" a solar panel system.

Can I own the solar system under a PPA?

Under a Power Purchase Agreement (PPA), you won't own the solar system. Instead, you are paying a provider for the energy you use. This means you won't get the benefits of owning a solar system, such as tax rebates or selling renewable energy credits to your utility.

Should I buy solar panels at the end of my PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. However, purchasing the system at the end of the contract would actually cost you more in the long run than if you had purchased a system to begin with.

The power purchase agreement (PPA) is a service/financial agreement under which a customer or host agrees under a contract to purchase power at a set price from a third-party project developer, also known as solar ...
