

Where are pylontech batteries made?

Pylontech, headquartered in China, has sold over 4.5 GWh of low- and high-voltage lithium iron phosphate (LFP) batteries. By 2022, the company was one of the top global residential battery suppliers, with over one million energy storage systems commissioned in over 80 countries.

Can pylontech batteries be installed indoors?

The battery modules should only be installed indoors with an IP rating of 20. All of the battery modules feature a depth of discharge of 95%. There are a number of features of the Pylontech battery worth mentioning: The Pylontech US2000B battery is designed to be compact and portable. The US2000B dimensions are 440\*410\*89 mm (W x H x D).

Are pylontech batteries reliable?

Pylontech has a solid reputation in the industry. Its batteries are widely regarded as high-quality and reliable energy storage systems for their outstanding features, including its flexible expandability, reliable performance, seamless integration, and unwavering commitment to safety and sustainability.

What is a pylontech lithium battery?

Pylontech's lithium batteries were some of the first modular batteries to be offered in the ESS market in an enclosure holding both the lithium cells and battery management/control system in a simple rack-mounted unit.

How long do pylontech batteries last?

Pylontech's batteries have cycle life that exceeds 6000 cycles, corresponding to about 11 years of work, with 80% capacity expected to be retained at the end of its lifespan. Pylontech's batteries come with an advanced in-built battery management system (BMS).

Are pylontech batteries vertically integrated?

Pylontech branded batteries are vertically-integrated meaning that the company is in charge of all stages, from design to construction, down to the smallest detail and does not outsource any of the process. Pylontech's LFP batteries are made with lithium iron phosphate (LiFePO<sub>4</sub> or LFP) battery cells.
