

Can Pylontech support multiple battery modules?

The Pylontech includes a Battery Management System (BMS) with each battery module. This BMS can support multiple battery modules connected in parallel and interfaces with the Victron GX device.

What is the voltage of a Pylontech battery?

The Pylontech battery has 15 cells in series, which means it stores 53.2V.

Why isn't my Pylontech battery working?

If your Pylontech battery is not working, check the following: Ensure the CAN-bus communication cabling between Pylontech and Victron system is correctly connected. Also, verify that the Pylontech battery is ready for use by checking the Max Charge Voltage parameter.

What is Phantom-s Lithium iron phosphate battery?

Phantom-S lithium iron phosphate battery is one of new energy storage products developed and produced by Pylontech, it can be used to support reliable power for various types of equipment and systems. Phantom-S is especially suitable for application scene of high power, limited installation space, restricted load-bearing and long cycle life.

Can victron batteries be used with pylontech batteries?

The combination of Victron products with Pylontech lithium batteries has been tested and certified by the Victron and Pylontech R&D departments. This manual is intended to be used in conjunction with the product manual supplied by Pylontech.

How do I charge my Pylontech battery?

To charge your Pylontech battery, it is recommended to use Victron 48V compatible MPPTs models with VE.Direct port. These MPPTs are controlled via the GX device and allow the battery to control the charge current for proper operation.

What Lithium Battery Charger is compatible with Pylontech US2000 Plus Battery. MultiPlus-II not going into float when Pylontech batteries are charged. Unknown charging current limitation Multigrad 48/3000/35. Is it ...
