

Qisa solar charger 38800mah solar power bank

What is a Qisa solar charger?

The QiSa Solar Charger is a portable power bank that uses solar power to charge up its large 38800mAh battery. It comes with two USB ports and a 10W Qi wireless charger, allowing you to charge up to three devices at once.

How many devices can a solar power bank charge?

Solar power bank 38800mAh large battery, let you get rid of the anxiety of battery power anytime and anywhere. Solar power bank has a wireless charging function, two 5V3.1A USB fast output ports, can charge up to 3 devices at the same time. Note: Only Qi-enabled devices are compatible with wireless charging.

How many devices can a 38800mah power bank charge?

38800mAh large-capacity power bank with solar panel can charge multiple devices simultaneously. It's perfect for carrying around, allowing you to keep mobile devices fully charged anytime and anywhere. The built-in strong LED flashlight is powerful that provides long run times.

How many USB ports does a power bank charger have?

Three fast output ports (Two USB and a Type-C) and one wireless output charging for your phone, tablet or other electronic devices. Two inputs (USB-C Port & Micro USB Port) Provides higher efficiency and faster charging speed for power bank charging. Solar charging efficiency is slow, and the power bank capacity is very large.

How long does a solar power bank take to charge?

It takes 6-8 hours to solar charging 5% of the battery. This function is an emergency function used in outdoor emergency situations. It is not recommended to be used as a daily worker. The power bank structure is sealed and dustproof, so there is no need to worry about dust entering the product and affecting normal use.

How does a solar power bank work?

With dual input ports (high speed Type-C and Micro USB), the power bank can charge devices through 2 input ports. It delivers the highest possible charging speed that is almost twice as fast as using the ordinary power bank with single input port. The solar panel can absorb sun light and convert it into electricity.
