

What are Queensland's solar rebates?

There are two key rebates in Queensland: the State Government's Solar Feed-in Tariff and Small-scale Technology Certificates. We explore both of these rebates and what they mean for Queenslanders (especially those considering adopting solar for the first time).

How can I save money on solar energy in Queensland?

Maximise your savings by using as much of your solar energy as possible during the day. Excess energy exported to the grid earns feed-in tariff credits but at a lower rate (typically 6-10 cents per kWh) than what you'd pay for grid electricity. Queensland's feed-in tariffs vary by electricity provider.

What is the solar rebate?

The Small-scale Renewable Energy Scheme (SRES), known as the solar rebate, operates within the Australian Government Renewable Energy Target and applies to small technology installations like rooftop solar.

What are Queensland's solar incentives?

Another of the Queensland government's solar incentives is the energy concessions program. This is a program conceived by the Queensland government to help low-income households pay their electricity bill and acquire renewable energy products at a low cost. To be eligible for the energy concession program, you must have a power bill you cannot pay.

Are solar panels a good investment in Queensland?

In Queensland, where solar power adoption is thriving, installing solar panels brings a lot of benefits. To help Queenslanders better understand the transition to solar energy, we shed light on the solar rebate scheme. Are you considering solar to save money on your home energy bills and utilise more sustainable energy sources?

Is the Solar Bonus Scheme still available in Queensland?

A now discontinued Queensland solar incentive is the Solar Bonus Scheme. It was a popular scheme that offered a high FIT of 44 cents. This high feed-in tariff encouraged many to be early solar adopters since it began in 2008 and ended in 2012. The Solar Bonus Scheme is currently not accepting new customers.
