

Why do Reddit users not want to buy solar panels?

Perhaps the top reason Reddit users don't want to buy solar panels is because of bad experiences with solar scams and pushy salespeople. u/Lovesolarthings said: The bad apples (with lies, poor service, high prices, poor equipment, etc) that poison the good experiences that a good consultant with a good company can create.

Are solar panels a good investment?

The "right answer" to this question depends on each homeowner's unique scenario, but there are some overarching principles to follow. Here are some examples: This Reddit user from Kentucky asked for people's thoughts and experiences with solar panels because they had heard going solar could save you money.

Are solar panels worth it?

Here are some examples: This Reddit user from Kentucky asked for people's thoughts and experiences with solar panels because they had heard going solar could save you money. What they heard isn't wrong - solar panels can save you money on your electricity bills. Exactly how much and if it's worth it is another story.

Should you buy residential solar panels?

With energy prices soaring, residential solar is becoming a meaningful cost-savings measure for more and more households. Still, there are plenty of people that don't want to buy solar panels for one reason or another.

Why do people not buy solar panels?

For every scam and pushy sales person there is an honest, experienced local installer ready to help you meet your energy goals. Another reason people don't buy solar panels is because they're stuck on a misconception about the solar industry, like that solar is expensive or short-lived. u/Jm11890 said: I've worked in the industry for 7 years now.

Which solar panels are best for your home?

Panels from Qcells, Silfab, and Meyer Burger are also excellent choices, and using them usually means a lower cost than the super-premium brands, without much loss of energy production. If the homeowner chose one of these quotes, there's more to it than just numbers.
