

What is the Remote Power System?

The Remote Power System from Mr. Solar® is a kit designed to provide AC power to remote cabins or off-grid locations. It is specifically designed for three mid-size 72 cell panels (24V).

What applications can a solar power kit be used for?

Our power kits can be used for many applications including Wi-Fi hubs, Communications systems, CCTV / Security Camera systems, LED Lighting, Electric Gates, and other lower power consuming electronics. These off-grid standalone remote solar power systems can be DC or AC power with the use of a power inverter.

What does a solar system kit include?

They can be used as a backup power, and emergency power for when/if grid tie power fails, or can be used as a permanent energy source for remote locations. Our system kits include the solar panel, battery bank, charge controller, battery enclosure, and DC to AC inverter (if required).

What is a remote solar power system?

Solar Illuminations' standalone remote solar power systems are great renewable energy solutions for powering small electronics in remote sites, or areas difficult to access grid power.

What are off-grid solar kits?

With your needs in mind, our off-grid solar kits are designed specifically to provide solar power to locations such as remote hunting, fishing, or vacation cabins as well as far-flung homes, fire towers, ranger stations, and even entire villages of cabins and tiny houses.

What are the small off-grid solar kits designed for?

Our small off-grid solar kits are designed for smaller structures like cabins, treehouses, and tiny houses. These kits are designed for lower wattage output for smaller off-grid applications.
