

How to replace a faulty battery in HP Chromebook 14 G3?

Remove the screws holding the battery in place using a Phillips screwdriver. Remove the battery. To reassemble your device, follow these instructions in reverse order. Give the author +30 points! Use this guide to replace a faulty battery in your HP Chromebook 14 G3.

How do I replace a Chromebook battery?

To replace a Chromebook battery, you'll need the following tools: If you plan to do this often, or if you have absolutely no tools, I suggest checking out the XOOOL 80-in-1 kit. It'll have everything you need, it's cheap, and it works. You can check it out on Amazon.

How do you recharge a Chromebook battery?

Let your Chromebook's battery fully drain the first few charge cycles. Then charge it back to 100%. Then use it back to 0% until it shuts off. Do this for the first few 3 charge cycles to utilize the entire battery reserve. This is a power cycle. After the battery is cycled when it's new, try to keep it partially charged from now on.

What happens if a Chromebook battery goes bad?

Over time, the battery will slowly degrade. You'll notice that it doesn't hold as much of a charge. It may drain quicker, charge slower, or have random jumps in the battery remaining. There's no need to trash or sell your Chromebook! You can replace the battery yourself with an OEM or third-party brand.

Where can I buy a new battery for my Chromebook?

There are several places online to buy a new battery whose specs match the original for about \$70. However, I managed to track down a \$50 used battery from Chromebook Parts. The company strips old Chromebooks down to their parts, selling them to DIYers, like you and me. The site has a variety of parts for this and other Chromebooks available.

How to save a Chromebook battery?

Sometimes you can shut down apps, games, tabs, music, movies, etc. that are just running in the background. This will reduce battery usage, speed up your Chromebook, and also generate less heat. If you plan to not use it for an extended time, remove the battery, place it in a zipper bag, and put it in the fridge.
