

What is Illinois Solar for all residential solar?

The Home Repairs and Upgrades initiative connects residents who need roof or electrical repairs to participate in Illinois Solar for All: Residential Solar with available funding opportunities to make their homes solar-ready. How much can I save with Illinois Solar for All: Residential Solar?

What are Illinois' new solar incentives?

Illinois homeowners can now access unprecedented renewable energy incentives, marking a transformative shift from previous solar incentives. The federal Investment Tax Credit (ITC) offers a 30% tax reduction on total system costs, while Illinois' Smart Solar program provides upfront rebates covering up to 40% of installation expenses.

Does Illinois have a solar energy program?

This program, which aligns with the state's ambitious renewable energy mandate, provides substantial financial benefits for property owners who invest in solar installations. Under current Illinois regulations, utilities must provide full retail rate credits for excess generation from systems up to 2,000 kilowatts.

How much does it cost to install solar panels in Illinois?

The average cost to install solar panels is \$20,476 in Illinois before factoring in the federal investment tax credit (ITC). After the ITC, the upfront cost drops to \$14,333. Going solar in the Prairie State is about 14% cheaper than the national average.

Does Illinois have a solar investment tax credit?

The federal solar investment tax credit (ITC) can save you the most out of any incentive for going solar in Illinois. Residents who install solar panel systems by the end of 2032 can deduct 30% of the system's total cost from that year's federal taxes. The credit includes the cost of equipment, labor and permits.
