

Is solar energy a good option in Minnesota?

As consumers learn more about solar potential in Minnesota, demand will continue to rise. Advances in technology, declining equipment costs, and financial assistance in the form of tax credits and incentives make solar an attractive clean energy option. If you are interested in powering your home with solar energy, Commerce is here to help.

How can I learn about solar energy in Minnesota?

Making electricity is the most common use of solar energy in Minnesota today. Learn about solar through sources such as the Clean Energy Resource Teams (CERTs) and the U.S. Department of Energy (DOE). Take a class on solar basics. See the U.S. DOE's Homeowner's Guide to Going Solar website. Check for community education opportunities in your area.

How much do solar panels cost in Minnesota?

However, most Minnesotans require a smaller-than-average system of just 8 kilowatts, bringing the total price to around \$20,160 after the federal tax credit is considered. Solar panels are more valuable in areas where energy needs or electricity rates are high. The price of electricity is around average, and the energy consumption is below average.

Should you install solar panels in Minnesota?

Installing solar panels leads to big long-term savings on electricity bills for Minnesota homeowners. On average, you'll spend \$10,815 to \$30,900 for panels that last about 25 years. Over that same time period, you'd avoid approximately \$59,279 in total utility costs.

How much can you save on solar panels in Minnesota?

Solar panel systems in Minnesota are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment.

What are the best solar panel incentives in Minnesota?

One of the best solar panel incentives in Minnesota is net metering. If you connect your solar panel system to the grid, you earn credits when you send excess electricity from your solar panels to the grid.
