

How much solar energy does Northampton have?

Northampton receives enough solar irradiance that a typical solar photovoltaic system will produce about 1 MWh of energy per year, per 1 kWp of solar panels installed [2]. That means you'll have plenty of available solar energy to convert into electricity for your home, business, school, or other site.

What is the largest solar farm in Northampton County?

The largest solar farm in Northampton County is located near Easton, PA, and provides clean solar energy to the Crayola factory. The solar farm has 30,000 panels that generate enough power for Crayola to produce 1 billion crayons and 500 million markers annually. Why the focus on Philadelphia County?
