

How much do solar panels cost in Ohio?

For many, the long-term savings outweigh the upfront costs within 11.5 years. Depending on the size of your system and what financial incentives you qualify for, a typical residential solar panel installation costs \$9,461 to \$27,031 in Ohio. On average, it takes solar panels approximately 11.5 years to pay for themselves in Ohio.

Is solar power a good fit for an Ohio home?

Solar panels can save the average Ohio homeowner \$32,468 after they pay for themselves, but they may not be suitable for everyone. Consider your home's electricity consumption to determine if solar panels will benefit you and your Ohio home. Solar panels are a good fit for the majority of Ohioans.

Do solar panels pay off in Ohio?

Based on feedback from hundreds of solar customers in Ohio, the general consensus is that solar panel investments pay off over time. Assuming an upfront purchase, it takes about 11.5 years to break even (when your savings with solar panels make up for the cost). The average solar panel installation costs \$2.66 per watt in Ohio.

Should you finance solar panels in Ohio?

Given rising energy costs in Ohio and elsewhere, financing solar panels makes sense as long as your monthly loan payment is less than what you would be paying the utility company anyway. Solar panels essentially generate free electricity once the initial installation costs are paid for. 3. Ohio solar incentives: tax credit and loan programs

How long do solar panels last in Ohio?

In Ohio, solar panels usually pay for themselves within 11.5 years. Given rising energy costs in Ohio and elsewhere, financing solar panels makes sense as long as your monthly loan payment is less than what you would be paying the utility company anyway.

Where should solar panels be installed in Ohio?

Ohio (and the rest of the United States) is in the northern hemisphere, so solar panels perform best on south-facing roofs. The worst place to install would be on north-facing roofs, especially if those roofs have a high pitch.
