

How much does a solar panel installation cost in Minnesota?

A typical solar panel installation costs \$10,815 to \$30,900 in Minnesota. How much you actually pay depends on the size of your system, what incentives you're eligible for and other factors. You also don't have to pay it all upfront. Based on feedback from several residents, solar investments tend to pay off over time.

How many solar installers are there in Minnesota?

According to the SEIA, there are currently 58 solar installers and developers in Minnesota. As solar panels grow in popularity, the number of installers in the state is likely to increase to keep up with demand. Finding the right solar installer for your home is crucial.

Should you install solar panels in Minnesota?

Installing solar panels leads to big long-term savings on electricity bills for Minnesota homeowners. On average, you'll spend \$10,815 to \$30,900 for panels that last about 25 years. Over that same time period, you'd avoid approximately \$59,279 in total utility costs.

What are the best Solar Lease companies in Minnesota?

Plus, SunPower guarantees the energy output from the system you lease, which is an additional protection that other companies don't always provide. Sunrun is another big name you'll likely come across when researching solar leases in Minnesota.

Do solar panels generate more electricity in Minnesota?

Minnesota receives less sun and more snow per year than the US average. Solar panels generate the most electricity if they receive at least 4 hours of direct sunlight each day. This means that while Minnesota does receive sunlight, it may not be as efficient for solar panel production as other areas.

Is solar power a good option in Minnesota?

Generally speaking, solar power is well-accepted in Minnesota, along with other renewable energy sources. The state is relatively environmentally conscious, with a Renewable Portfolio Standard (RPS) goal of producing around 26% of its energy production via clean energy sources by 2025.
