

Can I use a ring solar panel with a security camera?

Add an extra 3 metres of cable length to help your Solar Panel stay connected to your Security Camera whether it's up high, around a corner, or wherever it can get the most sun. For use with compatible Ring Solar Panels and Security Cameras only. Not recommended for use with other products.

How do ring solar panels work?

RING solar panels use the PV effect to convert sunlight into a usable energy source. The panels act as a trickle charger for the camera battery, increasing the battery life by about 1-2% each day, depending on the sun exposure.

Are ring solar panels compatible with the spotlight camera?

A small solar panel is compatible with the RING Spotlight Camera. They are very easy and quick to install. There are many products available on the market today. Do you know which ones are the best RING solar panels for your spotlight cam?"

How do I mount a solar panel and a ring security camera together?

Solar Panel clips onto mounting base and includes arms to wrap excess cable. Ring mounts, such as the Gutter Mount and Pole Mount for Solar Panels and Cams (sold separately) can help mount Solar Panel and Ring Security Camera together, without the need to drill an extra set of holes. See supported devices.

Is ring a good wireless home security camera?

If the idea of the having to recharge the battery on your wireless home security camera has put you off before then fear not; Ring has the answer. The Ring Spotlight Cam Pro Solar is powered by solar energy, even on consecutive cloudy days. The footage is also super crisp, and the audio is clear.

How much power does a ring solar panel use?

If the camera and night vision technology are engaged together this will use around 4-5 watts of energy. The highest power draw will be when the light and camera are both in use (when motion is detected). This requires a power draw of 25 watts. Does the RING Solar Panel Need Direct Sunlight?
