

What is Rocky Mountain Power?

Rocky Mountain Power is a utility company that is pioneering a new model for existing rooftop solar customers. They are transforming thousands of intermittent rooftop solar systems into firm dispatchable grid assets by retrofitting each home with a Sonnen battery.

Does Rocky Mountain Power offer a solar power incentive program?

Rocky Mountain Power's incentive program requires that the batteries be charged by on-site solar power systems in order to fully qualify. Electric utility Rocky Mountain Power (RMP) is incentivizing more than 50,000 residential and commercial solar power owners within Utah to install utility-managed Sonnen batteries.

Does Rocky Mountain Power offer net metering?

Rocky Mountain Power offers net metering or net billing compensation to customers in Idaho, Utah, and Wyoming. In Idaho, there is no overlap between service areas for Rocky Mountain Power and the state's other large energy suppliers, Avista Utilities and Idaho Power.

Who is a good fit for Rocky Mountain Power?

Rocky Mountain Power's Wattsmart Battery Program is ideal for customers who are early adopters of technology, energy conscious, and want to make a positive impact on the environment with renewable energy. If these are things you're passionate about, this is a great way to be a part of a new program.

What is Rocky Mountain Power's unused energy rate?

At the beginning of every calendar year, unused credits are sold to Rocky Mountain Power at the average wholesale energy rate for winter and summer, which is determined in Schedule 37 avoided cost rate. The current "avoided cost" rate is approximately 3 cents/kWh.

Does Rocky Mountain Power offer metering credits in Utah?

Importantly, Rocky Mountain Power doesn't offer full retail rates for their net metering credits in Utah: as of 2021, customers receive a credit rate of about 6 cents per kilowatt-hour (kWh), or roughly half of the retail rate. UAMPS is still in the process of creating a rate structure for its customers.
