

Does Rocky Mountain Power offer a solar battery incentive?

Rocky Mountain Power (RMP) offers an incentive for solar customers who install solar batteries. This incentive helps the power company manage the grid more effectively and can save them money. (Now operating under PacifiCorp)

Does Rocky Mountain Power offer incentives?

If you are planning a project over 25 kW and plan to sell power to Rocky Mountain Power, find information on qualifying facilities, grid connection requests and market-based incentives. If you have onsite solar generation, you can earn incentives for allowing us to automatically manage your battery as part of our smart grid.

Do I need a roof to get solar power?

Through Rocky Mountain Power's Subscriber Solar program, customers can get some or all of their energy from solar power without the need for a roof. Blocks for this program get sold out quickly, and if they are available, they will be displayed in the box above.

How can I get solar power in Utah?

You can get solar power in Utah by subscribing to a 20-megawatt solar plant in Millard County. Choose between offsetting your usage on your bill with blocks of 200-kilowatt-hours (kWh), or opt for full coverage where all of your kWh is billed on the Subscriber Solar rate. Keep your subscription for up to 20 years.

How much does a solar panel system cost in Utah?

The cost of a new solar panel system in Utah before incentives is around \$25,200. This is a few thousand dollars below the national average, largely because you can install a smaller-than-usual system to meet Utah's typical energy demands.

Do I need a roof for subscriber solar?

No roof is required for the Subscriber Solar program. Customers can get some or all of their energy from solar power. If you are interested in subscribing or joining the waitlist if blocks are unavailable, please contact us at 1-844-813-3971.
