

Can I charge my Ryobi batteries with solar?

I've made several prototypes that use Ryobi 18V batteries to charge USB ports or run a 13.8V regulated cigarette socket. I'd really like a product that can charge my Ryobi batteries with Solar and be able to run other devices like a refrigerator or freezer at the same time.

Can Ryobi charge a 40V battery?

Ryobi does not make an In-Vehicle charger for their 40v battery so we would have to create something ourselves. If I understand correctly I would need at least 40v+ of solar to be able to charge a 40v battery. I think that means hooking up two 24v solar panels in series so that I get a theoretical total of 48v from the solar.

Is there a solar charger / powerstation for Ryobi One+ 18V batteries?

I'm throwing out the gauntlet and prototyped a solar charger and powerstation for the Ryobi One+ 18V batteries. Hoping we can get Ryobi to make a real product ;- ) a simple DC/DC converter able to deliver 21V should fit the need. it cost about 5\$ on ebay.

Does Ryobi have a battery charger?

Yes Ryobi does offer an In-Vehicle Charger for their 18v battery not the 40v. Where you go from there just depends on your solar setup. You can get 12V sockets and spade terminals on ebay. Use to wire, then wire to 12V source such as your DC fuse box and your bus bar with ring terminals if DIY.

How do you charge a Ryobi battery?

Use the official charger. Don't get caught up in chasing efficiency. Except in mobile application overbuilding your array is more practical. Get a sonoff device or timer. Set it to turn on after 2pm (or whenever your main bank is charged). Plug your 110v Ryobi chargers in after the timer. That said, Ryobi packs are just 5s lithium packs.

Does Ryobi have a small inverter?

Ryobi's small inverters are lacking. They only have 2.1/2.4A USB support. The main thing my project added was Solar charging / Solar passthru. So I am able to run my freezer off the two 100w panels during the daylight. I'm looking for a product like a Bluetti, but uses your spare battery packs. Thanks for the link on the larger 40V battery packs.
