

Is there a solar charger / powerstation for Ryobi One+ 18V batteries?

I'm throwing out the gauntlet and prototyped a solar charger and powerstation for the Ryobi One+ 18V batteries. Hoping we can get Ryobi to make a real product ;-) a simple DC/DC converter able to deliver 21V should fit the need. it cost about 5\$ on ebay.

Can I charge my Ryobi batteries with solar?

I've made several prototypes that use Ryobi 18V batteries to charge USB ports or run a 13.8V regulated cigarette socket. I'd really like a product that can charge my Ryobi batteries with Solar and be able to run other devices like a refrigerator or freezer at the same time.

Does Ryobi have a small inverter?

Ryobi's small inverters are lacking. They only have 2.1/2.4A USB support. The main thing my project added was Solar charging /Solar passthru. So I am able to run my freezer off the two 100w panels during the daylight. I'm looking for a product like a Bluetti, but uses your spare battery packs. Thanks for the link on the larger 40V battery packs.
