

What is a solar sign lighting system?

Solar sign lighting systems can be used for commercial, residential or neighborhood signs, for internal or external illumination. Solar illumination is your one stop lighting solution for light billboards, and other sign types including sign cabinets, monument signs, entrance signs and business signs.

What are outdoor solar powered LED sign lights?

Outdoor solar powered LED sign lights are the perfect solution for illuminating signs in remote locations, or areas where it's too costly to access mains electric power.

What types of signs can be powered with a solar lighting kit?

Solar lighting kits can power internally lit, channel lettering lit, or externally lit signs. Traditional sign lighting systems often require long runs of electrical wire and burying (trenching) for installation, which can be avoided with solar lighting kits.

Do SolarBoom solar powered signs need a power supply?

With SolarBoom solar powered signs, there's no need for any untidy runs of power cables with SolarBoom. No need to tap into any third party power supply. Run the lights for as long as you like - zero power cost. Both the light output and operating time can be set to suit specific applications or local conditions.

Do you need an electrical contractor to install SolarBoom sign lights?

As well as eliminating any trenching, with SolarBoom solar powered signs, there's no need to employ electrical contractors to hook up lights to any nearby mains power supply. Real estate sign lights often have long extension cables running to the nearest electrical outlet which may need protection to avoid being a trip hazard.

What size solar sign lights do I Need?

With lengths of 12", 24" and 48" there's a size to suit most signs. Or simply add install extra SolarBoom solar sign lights in a row for longer signs. Equally suited for permanent installations or temporary use such as solar real estate sign lights where lights can be quickly mounted and dismantled as required.
