

Where is Shams solar power plant located?

Located in the Abu Dhabi desert, Shams is one of the world's largest concentrated solar power plants.

What is Shams solar?

Inaugurated in the Abu Dhabi desert in 2013, Shams is one of the largest concentrated solar thermal power plant in the world. We built the plant in partnership with Masdar and Abengoa Solar. For over 70 years, we have supported the United Arab Emirates in its effort to diversify its energy mix.

Who owns Shams power plant?

The plant is owned and operated by Shams Power Company, a consortium of Masdar (60%), Abengoa Solar (20%) and Total (20%). Abu Dhabi-based Masdar promotes renewable energy in the Middle East. Shams 1 was the company's second project registered with the UN and the first approved CSP plant under the clean development mechanism (CDM).

How big is the Shams power plant?

The Shams site is equivalent to the size of 285 football pitches. The 100-megawatt (MW) Shams Power Plant is contributing to the diversification of the United Arab Emirates' energy mix and helping to reduce the country's carbon footprint.

What is the Shams Ma'an Solar plant?

The Shams Ma'an solar plant, which was engineered and constructed by First Solar, is an important component in Jordan's strategic diversification of its generation portfolio. Home News Photo Gallery

Why should Abu Dhabi invest in Shams power plant?

Shams directly contributes toward Abu Dhabi's target of 30 percent power-generation capacity via clean energy by the year 2030. The plant also is helping the United Arab Emirates diversify its energy mix and reduce the country's carbon footprint.
