

# Shared charging stations company car park

Should residents be allowed to install charging stations in their own parking spaces?

The Board is trying to figure out how they can install charging stations dispersed across the property in a way that is convenient to where residents already park their cars, rather than grouping a bunch of stations on just one part of the lot. Should residents be allowed to install charging access in their own parking spaces? Florida law says yes.

Can I install a charging station in a parking spot?

When there is suitable electricity nearby, an electric vehicle charging station can be easily mounted on a nearby wall (ideally). However, when there is not suitable electricity nearby, installation can be much more complicated and costly.

What is a shared EV charging hub?

Shared EV charging hubs ensure maximum utilization of critical land resources and build EV charging infrastructure that benefits multiple stakeholders. Amplify Mobility is working on creating shared spaces for EV charging and has created such hubs in 7 cities that can cater from 5 to 50 vehicles simultaneously.

Who can own a charging station?

Charging station ownership can be either site-hosted or third-party (e.g., owned by a charging network).

Where should a public charging station be located?

According to MBBL-2016, public charging stations should be located on both sides of highways or roads every 25 km.

How e-commerce charging hubs should be planned?

Charging hubs should be planned in 3 to 4 km radius around the e-commerce hub. The idea is to create the charging infrastructure in areas with highest density of last mile distribution hubs. These charging hubs are utilized to the maximum by catering to multiple clients.
