

What are container homes?

Container homes are exactly what they sound like; homes made from the steel shipping containers that you see carrying goods everywhere on trains, trucks, and ships. From these giant Lego blocks, people are building homes of all shapes and sizes. Shipping containers are generally available in 10ft, 20ft, and 40ft.

Should you buy a shipping container home?

Think outside the box for your dream home. Shipping container homes redefine affordable and sustainable living. These modern marvels are not just sturdy and cost-effective but also eco-friendly. Intrigued? Let's explore the possibilities. Why spend a fortune on traditional housing when containers can create stylish, unique spaces?

How big is a shipping container house?

From these giant Lego blocks, people are building homes of all shapes and sizes. Shipping containers are generally available in 10ft, 20ft, and 40ft. The smallest shipping container can provide about 100 square feet of floor space for a shipping container home. Eight larger containers together can make a two-story house at about 1400 square feet.

What is a shipping container home?

Shipping container homes offer a stylish minimalist industrial look. Their sleek, metal exteriors mesh perfectly with modern, uncluttered design philosophies. Incorporating vertical gardens into these homes not only adds greenery but also enhances air quality and space efficiency. Plus, it's a cost-effective way to personalize your container home.

Can shipping containers be upcycled?

That means that over 11 million shipping containers could potentially be upcycled into stunning homes made from materials that might otherwise end up in the landfill. Container homes can also be less expensive than other homes with similar square footage (see: Pros, Cons, and Pricing article).

What are shipping containers used for?
