

How do you install a solar fan on a container roof?

The kit includes all the necessary hardware for mounting the fan onto the side and the solar panel onto the roof of the container. It comes with JB Weld, a high-strength adhesive, to securely bond the solar panel brackets to the container roof. The wires are pre-wired with connectors, ensuring easy and hassle-free installation.

What is a solar powered exhaust fan kit?

With our Solar Powered Exhaust Fan Kit, you can effectively improve ventilation and control the temperature inside your shipping container. By removing excess heat and moisture, this kit helps prevent damage to your stored items and creates a more comfortable and functional space. Don't miss out on the benefits of our Solar Powered Exhaust Fan Kit.

How do I install a solar powered exhaust fan kit?

Installing the Solar Powered Exhaust Fan Kit is straightforward. A hole needs to be drilled on the roof of the container, and a square hole must be cut in the side of the container. The kit provides a template for precise hole placement.

Do shipping containers have ventilation holes?

Most shipping containers will have built-in holes to act as ventilation. But the problem is that these holes aren't enough for this situation. It's best to install a ventilation system such as having intake vents, louver vents, or even a window.

What is a shipping container vent Kit?

The shipping container vent kit by CON-VENTS is an effective product for preventing moisture from building up. It comes with two vents that are designed to each end for cross ventilation. This product itself is designed to cover a 20-foot container. It can be placed anywhere, such as the side doors or windows.

How does a solar exhaust fan work?

Our exhaust fan operates on solar power, harnessing the energy from the sun to provide continuous ventilation without the need for external power sources. This energy-efficient solution reduces electricity consumption and helps maintain a comfortable environment within the container.
