Silicon power 120gb solid state drive

Which SSD is best for heavy users?

The SSD is ideal for heavy users to process large files and demanding programs. The S55is 7mm thin and vibration-proof since it contains no moving parts. Built with Bad Block Management,S.M.A.R.T. monitoring system and ECC technology,the S55 promises higher reliability and data transmission safety.

Why does the SP S55 have a lower capacity than other SSDs?

However,the SP S55 is built with Bad Block Management,which continually monitors and replaces bad blocks,keeping your system in good condition and prolonging the lifespan of your SSD. This is why the S55 offers a lower capacity than other SSD's,we have sacrificed capacity because we care more about your DATA! 1500G Max.

Is the Samsung S60 a good SSD?

The S60 is built with Bad Block Management, which can continually monitor and replace bad blocks to keep your system in good condition with prolonged lifespan of the SSD. The S60 is one of the lightest and thinnest SSD of its kind yet it is shock- and vibration-proof since it contains no moving parts.
