

What is the size of the solar project at Six Flags Great Adventure?

The solar project at Six Flags Great Adventure is 23.5-megawatt, making it New Jersey's largest net metered solar project. This project, in partnership with KDC Solar, nearly fully powers the theme park and is a giant step toward becoming a net-zero carbon facility.

Is Six Flags a solar park?

In 2019, Six Flags Great Adventure became the world's first major theme park to be nearly fully powered by solar energy. This 23.5-megawatt solar project, in partnership with KDC Solar, ranks as New Jersey's largest net metered solar project. It was a giant step toward becoming a net-zero carbon facility.

Does Six Flags Great Adventure still have parking lots?

The main parking lots remain uncovered; Six Flags Great Adventure Spokeswoman Kristin Fitzgerald said the park wanted to be able to continue using those lots to host future events. Winkler wouldn't say how much money the park expects to save on its electric bill with the new solar array.

Will Six Flags become a net-zero carbon facility?

"This project represents a giant step toward becoming a net-zero carbon facility," said Six Flags Great Adventure Park President John Winkler. State Sen. Bob Smith (D-Middlesex), the head of the state Senate's environment committee, praised the park's switch to solar as a model that should be replicated statewide.

Could New Jersey have the first amusement park powered by solar?

"New Jersey could have the first amusement park in the country powered by solar power." The remaining panels were placed over more than 2,000 parking spots in the Hurricane Harbor, employee and overflow parking areas.
