

What is a small Solar power system?

Each small solar power system is a complete kit that includes solar panels, inverter, batteries and the cables and fixings necessary to generate renewable energy. Our small solar panel kits are DIY but Sunstore can arrange professional installation for you if you prefer. Sale!

Do you need a small solar power system?

If you're considering a small solar power system, you'll need a solar panel. These systems can be a permanent addition to a cabin, RV, or other structure, or designed to be transportable.

What are the different options for small Solar power systems?

Small solar power systems can either be a permanent addition to a cabin, RV, or other structure or designed to be transportable. Before we look at the different options for small solar power systems, let's get an idea of the basic components of any solar installation.

What is a small Solar power generator?

A small solar power generator is a relatively cheap, sustainable way to generate off-the-grid power when you need it. For example, if you have a cabin that you can't connect to a power grid and you don't want to rely on a traditional gasoline-powered generator, you might consider installing a small photovoltaic solar power system.

Can a small solar power system be transportable?

Small solar power systems can either be a permanent addition to a cabin, RV, or other structure or designed to be transportable so you can take it with you. Before we look at the different options for small solar power systems, let's get an idea of the basic components of any solar installation.

What type of battery is recommended for a small solar power system?

Your battery is like the heart of your solar system: it stores electricity for when it's needed. There are many different kinds of batteries out there, but you'll likely want a deep cycle, sealed battery for a small solar power system. 100-watt solar panels are widely available online and can be had for \$100 to \$150 pretty easily.
